

NEON MINING CORPORATION

Next-Generation Decentralized Cloud Mining Infrastructure

INTRODUCTION & CLOUD MINING ARCHITECTURE

Neon Mining is a next-generation decentralized cloud mining infrastructure platform designed to provide automated, secure, and hassle-free cryptocurrency mining solutions without requiring personal hardware setup.

What is Cloud Mining?

Cloud mining eliminates the need for expensive physical ASIC hardware, complex cooling setups, and high electricity bills. Users gain access to industrial-scale mining power through a simple, transparent digital interface.

Virtual Hashpower Allocation	Users lease processing power directly from enterprise-grade mining data centers.
Automated Daily Settlements	Hashing yield is calculated automatically and credited every 24 hours in USDT.
Zero Maintenance	The facility manages machine maintenance, power optimization, and operational uptime.

Neon Mining delivers institutional-grade infrastructure to individual investors through a secure, fully automated platform — removing technical barriers while maximizing operational efficiency.

Why Neon Mining? Industrial-grade ASIC & GPU clusters • 100% green energy data centers • Cloudflare D1 distributed security • Automated 24-hour USDT yield credits • Zero hardware ownership cost.

4 CORE MINING FACILITIES & INFRASTRUCTURE

1. Enterprise ASIC & High-Performance GPU Clusters

Equipped with high-efficiency mining equipment engineered to deliver maximum hash-rate stability with minimal energy consumption. Hardware is continuously monitored and optimized for sustained peak performance across all mining contracts.

2. 100% Green Energy & Hydro-Cooling Systems

Eco-friendly hydro and wind-powered data centers featuring continuous thermal control to maintain peak 24/7 operating efficiency. Sustainable energy sources reduce environmental impact while ensuring reliable, uninterrupted power delivery.

3. Cloudflare D1 Distributed Architecture

Powered by Cloudflare D1 distributed database systems for secure, transparent accounting, real-time sync, and rapid transaction routing. This architecture guarantees data integrity, high availability, and global consistency across all nodes.

4. Automated 24-Hour Yield Distribution Engine

Fully automated smart systems that credit daily yields directly to user balances without requiring manual intervention. Settlements are processed every 24 hours with complete transparency and full auditability.

These four pillars form the operational backbone of Neon Mining, combining industrial hardware, sustainable energy, distributed security, and automation into a unified mining experience.

7 OFFICIAL MINING PLANS (365-DAY RUNTIME)

All plans operate on a fixed 365-day contract cycle. Daily yields are credited automatically in USDT. Returns shown below are calculated on the principal investment amount.

Plan Name	Investment	Daily Yield	Daily Return	30-Day Return	Annual Total (ROI)
01. Neon Lite	$20 USDT	1.00%	$0.20	$6.00	$73.00 (365%)
02. Cryptera	$50 USDT	1.10%	$0.55	$16.50	$200.75 (401%)
03. Novacore	$150 USDT	1.20%	$1.80	$54.00	$657.00 (438%)
04. Hypervex	$350 USDT	1.35%	$4.73	$141.90	$1,724.63 (492%)
05. Vantamine	$700 USDT	1.50%	$10.50	$315.00	$3,832.50 (547%)
06. Nexhash VIP	$1,500 USDT	1.70%	$25.50	$765.00	$9,307.50 (620%)
07. OmegaVIP Elite ★	$3,000 USDT	2.00%	$60.00	$1,800.00	$21,900.00 (730%)

*★ **OmegaVIP Elite** is the flagship plan offering the highest daily yield and maximum annual ROI. All plans include automatic daily credit and full platform support for the entire 365-day runtime.*

Investment Tip: Higher tier plans deliver stronger daily yields and superior annual ROI. All contracts run for a fixed 365 days with automated USDT settlements every 24 hours. You can start with any plan and upgrade or reinvest commissions at zero transfer fees.

3-LEVEL DIRECT REFERRAL BONUS

Direct referral commissions are credited instantly upon package purchase and account activation. Build your network and earn across three generations of partners.

Level 1 — Direct Referrals	10% Instant Bonus
Earn a direct 10% commission whenever your direct invitee purchases a mining package. This is the strongest and most immediate reward layer in the referral system.	

Level 2 — Second Generation	5% Instant Bonus
Earn 5% on plan purchases made by members referred by your Level 1 partners. Expand your earnings through your direct team's growing network.	

Level 3 — Third Generation	2% Instant Bonus
Earn 2% on package activations completed across your third-tier network. Passive depth rewards that scale with sustained long-term network growth.	

Reinvestment Advantage

Commissions can be withdrawn instantly or compounded directly into higher hashpower contracts at zero transfer fees. This frictionless reinvestment option allows rapid scaling of mining power and accelerates overall portfolio growth.

10-TIER OVER-RIDE COMMISSION (ORC)

The Over-Ride Commission (ORC) provides daily recurring passive income calculated from downline members' total earnings (Mining Yield + Referral Earnings). This creates a continuous residual income stream that rewards network depth.

Network Tier	Coverage Scope	Recurring Commission Rate
Level 1	Direct Personal Referrals	5.0% of total earnings
Level 2	Second-Generation Team	3.0% of total earnings
Level 3	Third-Generation Team	2.0% of total earnings
Levels 4–10	Downline Network (7 Additional Levels)	1.0% per level of total earnings

ORC is calculated daily on the combined mining yield and referral earnings of your entire downline within the covered tiers. This residual structure rewards consistent long-term network development and depth.

Key Advantage: Unlike one-time referral bonuses, ORC generates ongoing daily income from the productive activity of your entire network — creating true passive residual earnings.

ROYALTY INCOME POOLS & PLATFORM SPECIFICATIONS

Company Net Profit Royalty Pools

Designed for top leaders based on cumulative team staking milestones. Pools are distributed equally among all qualified members who meet the required team stake threshold.

Tier	Team Stake Requirement	Pool Share
Tier-1 Leaders	$50,000	5% Company Net Profit Pool
Tier-2 Leaders	$100,000	3% Company Net Profit Pool
Tier-3 Leaders	$200,000	2% Company Net Profit Pool

Platform Limits & Account Security

Minimum Deposit	$10.00 USDT (0% deposit fee)
Minimum Withdrawal	$2.00 USDT (Instant 24/7 processing)
Withdrawal Processing Fee	5% flat fee
Supported Network	Binance Smart Chain (BEP-20)
Internal P2P Transfers	0% transfer fee
Security Layer	6-Digit Fund PIN Protection & 24/7 Support Desk

Neon Mining Corporation — Automated • Secure • Transparent

All yields, commissions, and pool distributions are subject to platform terms and operational performance.
